Enclosure**

**Rugged
Electronics**

**Central Reporting &
Management**

InControl²

Setup. Manage. Report.
InControl 2 Cloud Management

AP Controller

AP Controller with
Peplink Balance Multi-WAN Routers

Go the Distance.

Our exclusive TruePower RF range- and signal-boosting technology virtually eliminates dead spots and dropouts. With TruePower RF, you get full transmit power across all channels, giving you unmatched range and reliability with less equipment and fewer management headaches. TruePower RF requires zero setup or configuration, and it's part of every AP One access point.

Go for Easier AP Management.

It's simple to configure AP One series access points wherever you work. For onsite management, you have complete control and comprehensive reporting from any Peplink Balance router. And with InControl 2, our cloud management solution, you get real-time client lists and bandwidth activity, plus a handy device snapshot, all from any device running a supported web browser.

Go Wireless Anywhere.

Indoors or outdoors, there's an AP One access point for any job.

AP One Flex

The AP One Flex features an IP55 all-weather enclosure and provides seamless coverage over large areas.

AP One 300M

Housed in tough metal enclosures and easy to integrate with the rest of your network, the AP One 300M set the standard for high-performance, low-maintenance indoor Wi-Fi.

AP One In-Wall

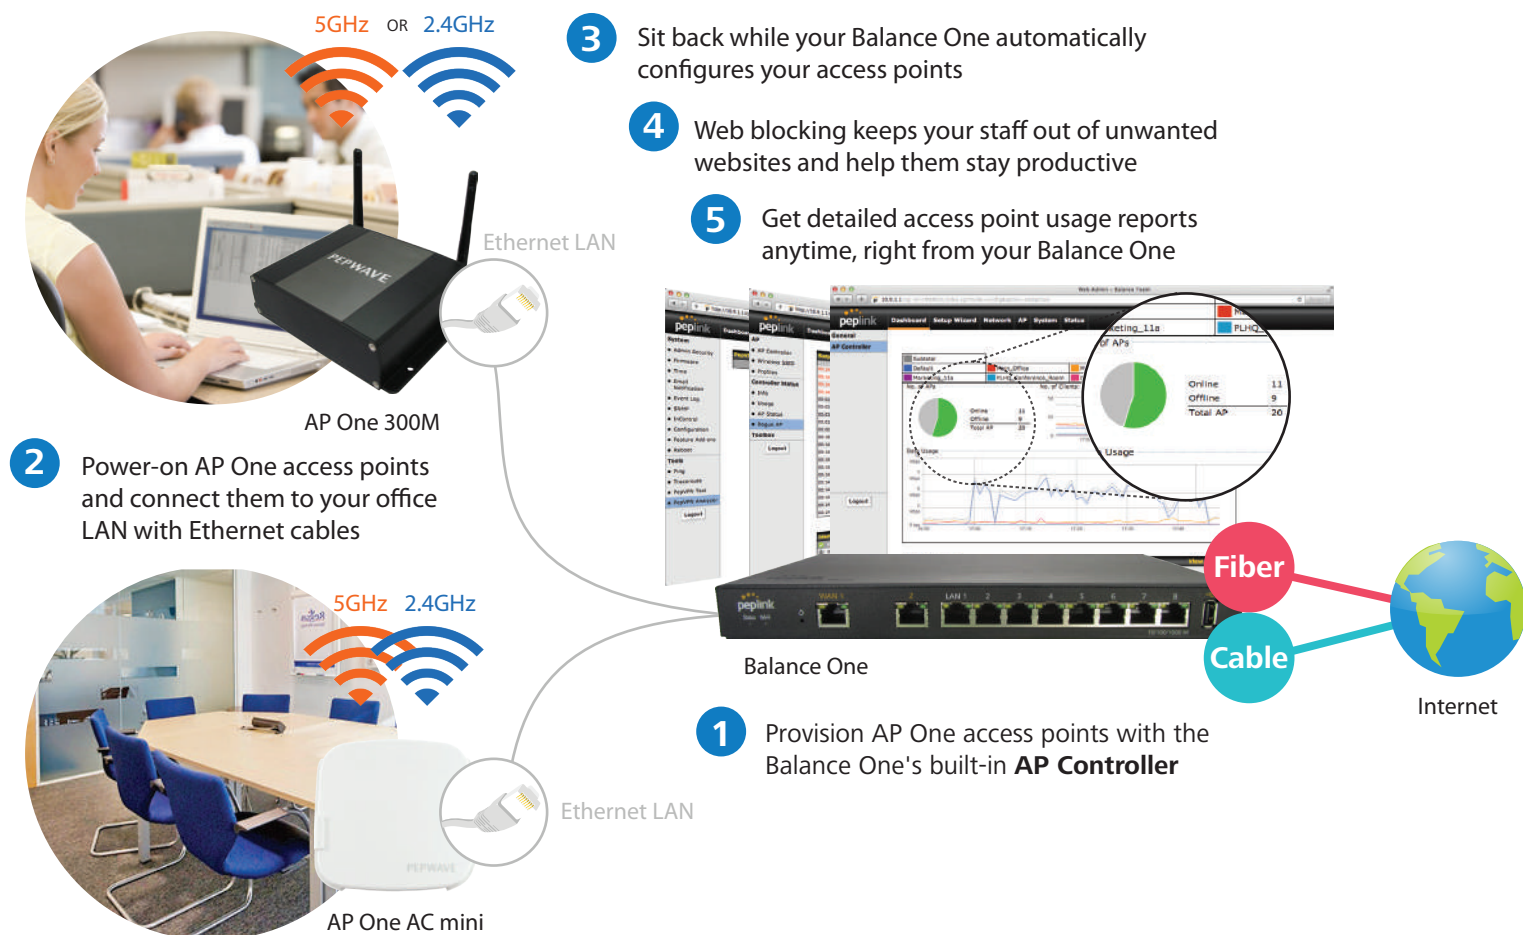

The AP One In-Wall mounts on a standard electrical outlet box for installations without big boxes or nests of wires.

AP One AC mini

Compact and capable, the AP One AC mini delivers true AP One power in a pint-sized package that fits in your pocket.

Applications

For SMBs – Setup, Manage, and Monitor Office Wi-Fi from Your Peplink Balance

For Hospitality – Offer Guest Hotspots Complete with Captive Portals

* Requires 48V Pepwave passive PoE input, available separately.

For Education – Setup, Manage, and Monitor Campus Wi-Fi from Your Peplink Balance

* Requires 48V Pepwave passive PoE input, available separately.

AP Controller is a software-based AP management tool for Balance and select MAX routers. It lets you manage your entire wireless network, with AP One and AP Pro, from your Balance or MAX router. Visit peplink.com/ap-controller for details.

Features

Network

Bridge Mode
Router (NAT) Mode
Wireless Distribution System (WDS)
Support for PPPoE, Static IP, DHCP
Management VLAN (802.1p)
Spanning Tree Protocol (802.1d)

Radio

Multiple SSID
Auto Channel Selection
Transmit Power Adjustment
Neighbor AP Detection

Client Management

Per SSID
VLAN with QoS (802.1p/802.1q)
Bandwidth Control
MAC Address Filtering
Layer 2 Client Isolation
Limit on Max. Number of Client

Per Client

VLAN with RADIUS
VLAN with VLAN Pool
Bandwidth Control
Multicast Filter
IGMP Snooping/Multicast Enhancement

AP Security

Open, WEP
802.1x with Dynamic WEP
WPA-PSK/RADIUS
WPA2-PSK/RADIUS

Complete VPN Solution

PepVPN
Site-to-Site VPN
256-bit AES Encryption
Pre-shared Key Authentication
Dynamic Routing

Captive Portal

By InControl
By Peplink AP Controller

Device Management

Web Administrative Interface
InControl Cloud Management
Peplink AP Controller
SNMP v1, v2c and v3

Certification

FCC, CE, RoHS

Specifications
