

Peplink Balance 2500

The Most Powerful Balance Yet.

One Box. Exceptional Performance for Thousands of Users.

Need speed? In standalone deployments, the all-new Balance 2500 multi-WAN router pumps data at 8Gbps to handle even the largest enterprise, campus, and public safety networks. Multi-site SpeedFusion™ deployments get 2Gbps performance for up to 4000 simultaneous SpeedFusion VPN peers, perfect for mobile command, transportation, and branch office applications. And thanks to a dozen onboard Gigabit Ethernet WAN ports, plus eight Gigabit Ethernet LAN (or two 10Gbps fiber) ports, you'll cut equipment and maintenance costs without sacrificing a thing. Onsite or on-the-go, everyone gets high-speed communications, secure 256-bit encryption, and rock-solid connections.

Fiber. End-to-End.

Why slow down your fiber LAN with copper? Get the Balance 2500 with dual 10Gbps fiber LAN interfaces and get blazing performance throughout your enterprise, over every link. Whether you're transferring large files, video conferencing, running large VoIP deployments, or just trying to get all the speed you paid for, the Balance 2500 keeps your network running fiber-fast and fiber-reliable, end-to-end.

Get Up to Speed on the All-New Balance 2500.

8Gbps throughput. Support for up to 4000 secure VPN connections at once. 10Gbps fiber connectivity. And all the WAN/LAN connections you need to drive down costs while boosting performance. For more information on the Balance 2500, our most powerful Balance yet, contact your Peplink representative today.

Product Ordering Information

Product Code	Description
BPL-2500	12x Gigabit Ethernet WAN. 8x Gigabit Ethernet LAN.
BPL-2500-SFP	12x Gigabit Ethernet WAN. 2x 10Gigabit fiber LAN.
