

Advanced Network Routers

Sophisticated Routing Features

Advanced Security, Monitoring, and Management

High-Performance Gigabit Ports

Overview

Ubiquiti introduces five new routers for the EdgeMAX® platform:

- EdgeRouter™ 12P
- EdgeRouter 12
- EdgeRouter 10X
- EdgeRouter 6P
- EdgeRouter 4

They join the array of cost-effective Gigabit routers:

- 8-Port EdgeRouter Pro
- 8-Port EdgeRouter
- 5-Port EdgeRouter PoE
- 3-Port EdgeRouter Lite

High Performance

The EdgeRouters offers superior routing combined with top price/performance value for your routing applications.

The EdgeRouter 4, 6P, 12, and 12P are each capable of routing up to 3.4 million packets per second.

The 8-Port EdgeRouter and EdgeRouter Pro route up to 2 million+ packets per second, while the EdgeRouter Lite and EdgeRouter PoE route up to 1 million packets per second.

PoE Flexibility

The EdgeRouter 6P, PoE, and 12P include configurable PoE ports to power airMAX® products, and the EdgeRouter 12 has a PoE input port and a PoE passthrough port.

Fiber Connectivity

The EdgeRouter 4 and EdgeRouter 6P provide an SFP port. The EdgeRouter 12 and 12P feature dual SFP ports, while the 8-Port EdgeRouter offers two combination RJ45/SFP ports.

Typical Service Provider Deployment

Manage Your Network

DHCP Server Set up multiple DHCP servers to assign IP ranges in different subnets on the different interfaces.

Easily control dynamic and static IP addressing for your network devices.

Monitoring Tools Conveniently track network activity and devices from tools such as *Ping*, *Trace*, *Discover*, *Packet Capture*, and *Log Monitor*.

Secure Your Network

Firewall Policies Organize the rules you apply in the order you specify.

Firewall Groups Apply the policies to groups filtered by IP address, network address, or port number.

NAT Rules The EdgeRouter changes packet addressing based on your customized source and destination NAT rules.

Direct Traffic Flow

Interfaces Each port functions as an independent interface.

You can also configure Virtual Local Area Network (VLAN) interfaces for network segmentation.

Routing Configure static routes and dynamic routing protocols to effectively manage the routes used by the EdgeRouter.

Example of Enterprise Deployment with SFP Connection to the Internet

Software

Intuitive User Interface

The EdgeRouter provides a graphical user interface designed for convenient setup and control. Easily configure the routing, security, and management features required to efficiently run your network. For advanced network professionals, an integrated CLI is available for quick and direct access using familiar commands.

Even greater convenience and flexibility is provided by the UNMS™ app, which makes it possible to manage the EdgeRouter remotely from your mobile device.

Powerful Features

EdgeOS® is a sophisticated operating system loaded with robust features, including:

- VLAN interfaces for network segmentation
- Static routes and support of routing protocols: OSPF, RIP, BGP, and MPLS
- Firewall policies and NAT rules
- Application identification with Deep Packet Inspection (DPI)
- DHCP services
- Quality of Service (QoS)
- Network administration and monitoring tools
- Administrator and operator accounts
- Comprehensive IPv6 support

Configuration by CLI

The CLI provides quick and flexible configuration by command line and features the following:

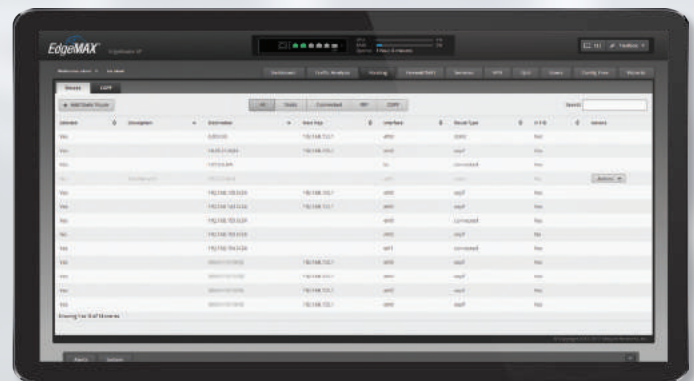

- For power users, configuration and monitoring of all advanced features
- Direct access to standard Linux tools and shell commands
- CLI access through the following:
 - Serial console port
 - SSH
 - Telnet
 - Graphical user interface

The Dashboard screen displays detailed statistics: IP information, MTU, transmit and receive speeds, and status for each interface.

The Traffic Analysis screen displays status information about the traffic traveling through the EdgeRouter, including the local hosts and types of network traffic.

The Routing > Routes screen displays static, connected, RIP, and/or OSPF routes. You can add static routes on this screen.

Management Flexibility

In addition to the EdgeOS software, the EdgeRouter provides the following options for convenient management.

Centralized Control

The EdgeRouter is supported and managed by the Ubiquiti® Network Management System. UNMS™ is a comprehensive management controller featuring a graphic UI that is easy to navigate. You can use a single control plane to manage registered EdgeMAX devices across multiple networks and sites.

Mobile App

The UNMS app allows you to manage the EdgeRouter using your mobile device. The app can be downloaded from the App Store® (iOS) or Google Play™ (Android).

Once the UNMS app is installed on your mobile device, simply connect to a wireless network that has access to the EdgeRouter, discover the EdgeRouter, and log into its configuration interface.

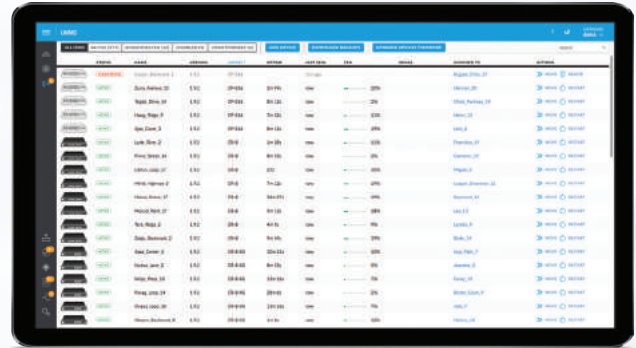

You can display and configure various settings, such as interface information, throughput per port, system settings, and more.

Optional Rack Mount

You can use the EdgeRouter Rack Mount Kit to mount the following models in a standard 1U high rack.

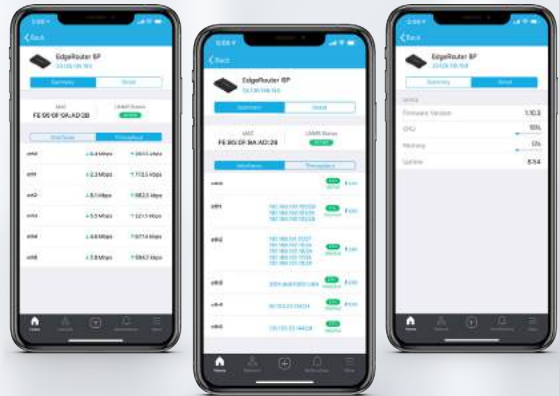

- EdgeRouter 12P
- EdgeRouter 12
- EdgeRouter 10X
- EdgeRouter 6P
- EdgeRouter 4

Rack Mount Kit

Model: ER-RMKIT

EdgeRouter 12P

- (10) Gigabit RJ45 routing ports
- 24V PoE support on RJ45 ports
- Ports 0-7 can be configured for line-rate Layer 2 switching
- (2) Gigabit SFP ports
- 3.4 million packets per second for 64-byte packets
- 6.8 Gbps for packets 1518 bytes or larger in size
- Silent, fanless operation
- Compact, durable metal case

ER-12P

EdgeRouter 12

- (10) Gigabit RJ45 routing ports
- 24V PoE input on port 0
- 24V PoE passthrough option on port 9
- Ports 0-7 can be configured for line-rate Layer 2 switching
- (2) Gigabit SFP ports
- 3.4 million packets per second for 64-byte packets
- 6.8 Gbps for packets 1518 bytes or larger in size
- Silent, fanless operation
- Compact, durable metal case

ER-12

EdgeRouter 10X

- (10) Gigabit RJ45 routing ports
- 24V PoE input on port 0
- 24V PoE passthrough option on port 9
- Ports 0-9 can be configured for line-rate Layer 2 switching
- 260,000 packets per second for 64-byte packets
- 1 Gbps for packets 1518 bytes or larger in size
- Silent, fanless operation
- Compact, durable metal case

ER-10X

EdgeRouter PRO

- (6) Gigabit routing ports
- (2) Gigabit RJ45/SFP combination ports
- 2 million+ packets per second for 64-byte packets
- 8 Gbps for packets 512 bytes or larger in size
- Rackmountable

8-Port EdgeRouter

- (8) Gigabit routing ports
- 2 million packets per second for 64-byte packets
- 8 Gbps for packets 512 bytes or larger in size
- Rackmountable

ER-8 (Top), ERPro-8 (Bottom)

EdgeRouter 12P (Model: ER-12P)	
Dimensions	268.1 x 136.5 x 31.1 mm (10.55 x 5.37 x 1.22")
Weight	700 g (1.54 lb)
Max. Power Consumption	20W (Excludes PoE Output)
Power Method	External AC/DC Power Adapter, 12W (24V, 2.5A) (Included)
Power Supply	External AC/DC Adapter
Supported Voltage Range	9 - 30VDC
Button	Reset
LEDs	
Data Ports	Speed/Link/Activity, PoE
SFP Data Port	Link/Activity
Networking Interfaces Management	(1) RJ45 Serial Port
Networking	(10) Ethernet Ports (Default Port 0) (10) 10/100/1000 RJ45 Ports with PoE (2) 1 Gbps SFP Ports
Layer 3 Forwarding Performance	
Packet Size: 64 Bytes	3,400,000 pps
Packet Size: 1518 Bytes or Larger	6.8 Gbps (Line Rate)
Processor	4-Core 1 GHz, MIPS64
System Memory	1 GB DDR3 RAM
On-Board Flash Storage	4 GB eMMC, 8 MB SPI NOR
Mounting	Wall, Rack*
Operating Temperature	-10 to 40° C (14 to 104° F)
Operating Humidity	10 - 90% Noncondensing
Certifications	CE, FCC, IC

* With optional Rack Mount Kit, model ER-RMKIT

PoE with 24VDC Power Adapter	
PoE Interfaces	(10) 24V Passive PoE Ports, 2-pair (4, 5+; 7, 8-)
Passive PoE Max. Wattage Per Port	17W (24V)
Voltage Range Passive PoE	24V: 20 to 30V
